DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the citizenship of the inventor.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaminski et al.

With respect to claims 1 and 6, the reference discloses piezoelectric layers **102**, **104**, and **106**.

The reference does not disclose the use of two types of materials.

The Examiner takes Official Notice that the properties of PZT, both ferroelectric and piezoelectric, would have been known to one of ordinary skill in the art.

It would have been well known in the art to PZT in the device of Kaminski et al for the purpose of utilizing it's well known properties.

With respect to claims 2 and 7, the reference does not show the same electrode arrangement.

The Examiner takes Official Notice that it would have been well known to use a common electrode for the purpose of reducing the number of parts and assembly steps.

It would have been obvious to use a common electrode for the for pairs of layers for the purpose of reducing the number of parts and assembly steps.

With respect to claims 3-5 and 8-10, no structural limitations have been added in these claims. See MPEP 2111.02.
